## Upcoming album 2008 - demo cd

Global Vocal, Wild Grooves & World Electronica

On the sequel to her first album 'Muse' Gudrun Holck ventures down hitherto unknown avenues. She collaborates with producers coming from a different musical background than her own in order to create new expressions for her unique blend of music.

On this new album Gudrun sings mostly in her native language, Danish. This does not mean that she abandons her style of wordless vocals.
